

AGMA Foliar trial

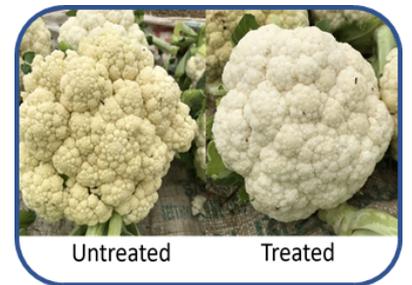

Trial on Cauliflower (*Brassica oleracea*)

Field trial

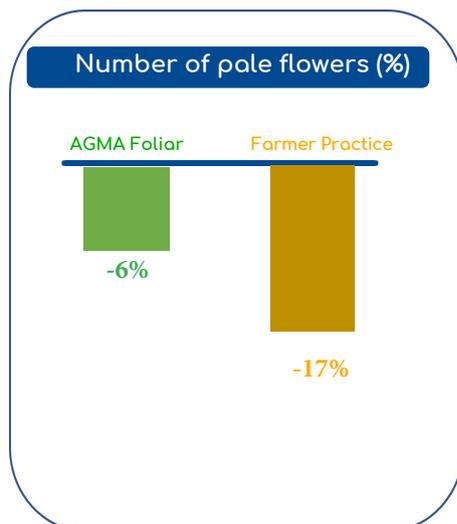

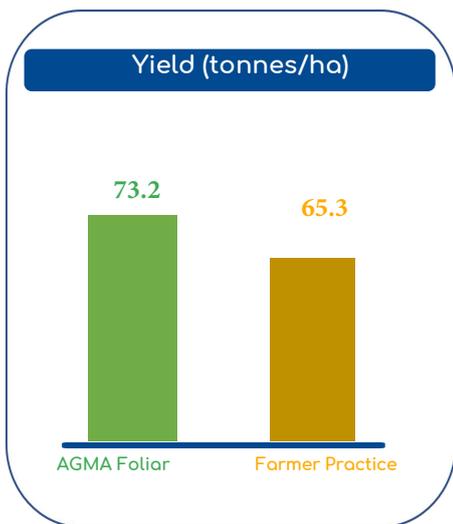

- Rajasthan, India
- 2019-20
- Statistical significance
- In-House field Trial

Test Product	AGMA Foliar
Method of Application	AGMA Foliar: Spray
Objective	To study efficacy of AGMA foliar on
Trail Design	RBD
Dose	500 ml/acre

- ✓ Increment in yield was recorded 12.03 % in comparison to farmer practice
- ✓ Plant growth was more vigorous and greener than farmer practice
- ✓ There were significance decrease in no. of pale flower

Average Production: 65.3 tonnes/ha Harvesting
 with AGMA Product: 73.2 tonnes/ha
 Difference: +12.03%

Yield (t/ha)

Low market value yield
