

Surety Trials

Comparative Trials in Olive

Commercial trial

Massafra, Italy

2020

Test demonstrating efficacy of Surety on enhancing olive trees' development and production

Product Surety® MA

Application Method 2 qts/a foliarly post-vegetative growth and after fruit-setting, and 2 qts/a drip pre-flowering, during flowering, and post-color change

Control Grower standard practice

Test Surface 4 x 6 yards

- ✓ Increase in yield (lbs/plot)
- ✓ Increase in mean oil yield (%)
- ✓ Increase in mean polyunsaturates (%)

Average yield: 184.1 lbs/plot

Average yield with Surety®: 238.7 lbs/plot

Difference: +29.6%

Average oil yield: 11.8%

Average oil yield with Surety®: 12.9%

Difference: +17.8%

Average polyunsaturates: 9.1%

Average polyunsaturates with Surety®: 28.5%

Difference: +23.5%
